Discovering Your Potential

Pinta Business Process Excellence

April 2023

Business Process Excellence

Complimentary capability & enhanced offering
to the Pinta Consulting business model
specialising in **business process excellence**

Our process & solutions are **customised to our individual customers culture, requirements & challenges**

What We Deliver

We help our customers develop a clear view of their current processes:

Working collaboratively to identify main pain points, inefficiencies, challenges & opportunities

Developing solutions and supporting their implementation

Conducted through
collaborative interactive workshops
which we support globally, locally, in person or virtually

Working across all sectors & industries with global end to end experience

- + BioPharma
- + Medical device
- + Financial services
- + Shared services
- + ICT/high tech

Our Approach

Process & solutions are customised to our individual customers culture, requirements & challenges.

01.

We **bring together multiple internal & external customers / suppliers** in immersive sharing to **develop visualisations of their processes**
i.e. sites, services, functions, business units & geographies.

02.

This leads to invaluable learnings & understandings of each other's processes, their touch points, focusing on the impacts & demands of what is done or not done.

03.

By visualising the entire end to end process we **crystalize the challenges & opportunities, prioritise & develop solutions** to address.

Previous projects include but not limited to:

Pharma & Biotech:

Global Supply Chain analysis (value stream mapping)

Designing & implementing operational excellence programs

Product development / improvement / Life Cycle Management

COGs improvements

Global Inventory improvement

Global adherence to schedule

Analytical development

Global quality QC & release practices

Manufacturing Process
